- AJ 9%
- A&A 11%
- ApJ 26%
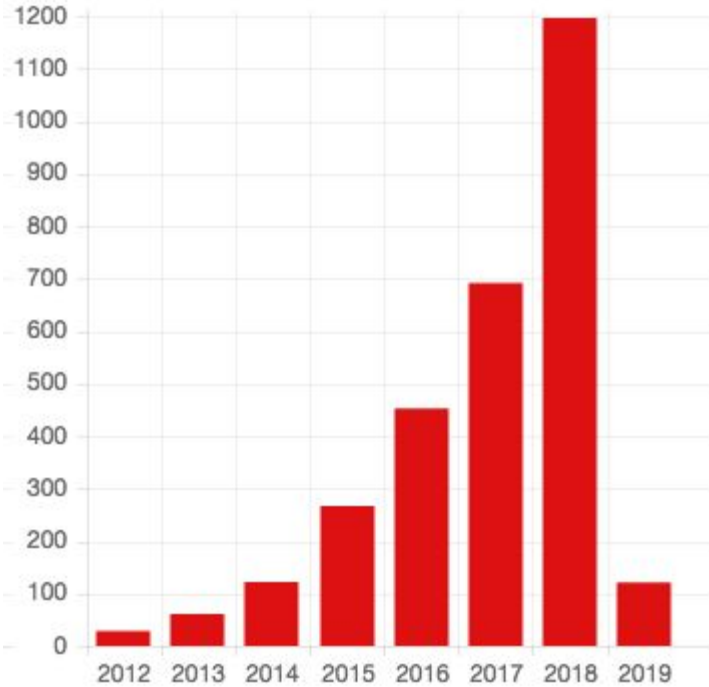

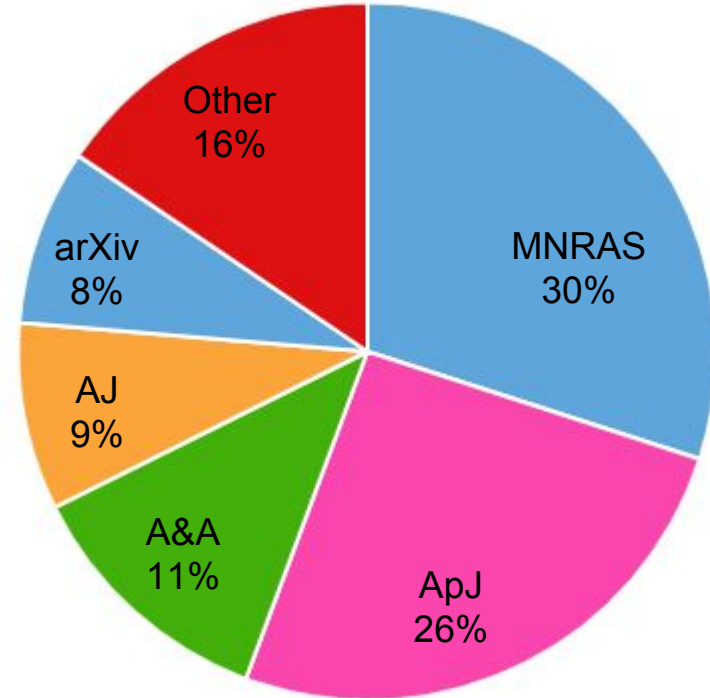

As of January 22, 2019; graphs from http://ascl.net/dashboard, stats from ADS

Recent activities/projects/additions

Institutional outreach and wider range of conference presentations

"Appears in" links disambiguated into "Used in" and "Described in", ingested by ADS, and appearing as Associated Article(s) ([example](#))

Submission by link to CodeMeta file ([form](#))

Inclusion of "Preferred citation" when known ([example](#))

Funded project to make NASA astro research software more discoverable

Future activities/projects/additions

Expand outreach to institutions and through conferences

Continue adding preferred citation information

Auto-generation of CodeMeta/CFF for use by authors

Sharing/developing best practices with other code registries/repositories; possible meeting/workshop with these entities to encourage adoption of CodeMeta/CFF
